SATOHI - Built to Perform. Built for You.

ABOUT SATOHI

SATOHI is more than a tool brand. It is the story of a commitment to creating equipment that professionals can trust with their work.

Founded in 2024, SATOHI was established with a single goal: to offer builders and installers reliable professional tools at a fair price. We believe that quality tools should not be a luxury. They should help people earn a living and complete their work faster, more safely, and with greater satisfaction every day.

Every new model is the result of continuous development. We listen closely to feedback from professionals, refine our designs, improve reliability, extend service life, and introduce modern technologies. Our goal is not simply to release another tool, but to make each one better than the last.

Today, SATOHI offers a range of professional gas-powered fastening tools, cordless power tools, and construction equipment trusted by professionals. For us, however, this is only the beginning.

Our goal is to build a global professional tool brand synonymous with quality, reliability, and innovation.

We do not create tools for display. We create them for the people who build homes, factories, cities, and the future every day.

SATOHI -
TOOLS THAT WORK WITH YOU

SATOHI

A tool for every job

GPN01 · GPN88 · GPN100 · LD40B

DSO08 · CN55 · CN70 · NLP40

Gas-powered, cordless and pneumatic tools for fastening, timber construction and finishing.

SATOHI GPN01

A RELIABLE START IN GAS-POWERED FASTENING

GPN01 is a versatile gas-powered direct fastening tool for professionals looking to move from drilling to fast, direct fastening.

Its simple design, high impact energy, and straightforward maintenance make this model suitable for both initial projects and regular use.

TECHNICAL SPECIFICATIONS

- Impact energy - 90 J
- Fastener length - 16-40 mm
- Magazine capacity - up to 30 nails
- Drive depth adjustment
- Suitable for concrete, brick, masonry blocks, and metal
- Self-contained operation without a compressor or mains power

KEY BENEFITS

- A practical first gas-powered fastening tool
- Fast direct fastening without pre-drilling
- Compact, user-friendly design
- Significantly speeds up repetitive fastening work
- Suitable for electrical installation and fastening clips, cables, profiles, and building services

GPN01

The Right Start in Professional Fastening

SATOHI GPN88

MORE CONTROL. LONGER LIFE. BUILT FOR INTENSIVE USE.

GPN88 is an upgraded model for professionals who require a higher level of comfort, control, and reliability.

Its reinforced housing and improved internal support points are engineered for extended service life.

TECHNICAL SPECIFICATIONS

- Fastener length - up to 40 mm
- Operating speed - up to 30 shots/min
- Magazine with visual fastener level indicator
- Adjustable driving force/depth
- Battery charge indicator
- Ergonomic rubberized grip
- Contact mechanism for stable positioning
- 2 batteries included

KEY BENEFITS

- Reinforced, more durable housing
- Improved internal support points
- More precise control over every shot
- Greater comfort during extended use
- Suitable for electrical installation, cable routes, ceiling structures, and fastening to hard substrates
- Comprehensive accessory package

GPN88

Works at Your Pace. Every Day.

SATOHI DSO08

PROFESSIONAL GAS NAILER FOR WOOD

The DSO08 is designed for fast, repetitive fastening of timber structures.

Its self-contained gas-powered system allows operation without a compressor, hoses, or a mains power connection.

TECHNICAL SPECIFICATIONS

Impact energy - 90 J
Nail length - 50-90 mm
Fastener type - 34° collated nails
Nail collation - paper tape
Magazine capacity - up to 80 nails
Driving depth adjustment
Dry-fire lockout
Weight - approx. 3.5 kg

KEY BENEFITS

Drives nails up to 90 mm long
Fully self-contained operation
No compressor or air hose required
High-speed repetitive fastening
Depth adjustment for different materials
Ideal for framing, battens, roofing, and other carpentry work

DSO08

Freedom to Work Without a Compressor

SATOHI GPN100

The professionals' choice for everyday work

A professional gas-powered direct fastening tool for tradespeople and crews. Designed for high-volume fastening into concrete, brick and other hard substrates.

Technical specifications

Impact energy	100 J
Fastener length	up to 40 mm
Firing rate	up to 30 shots/min
Indicator	Battery charge
Housing	Reinforced construction
Grip	Ergonomic, rubberized
Operation	No compressor or mains power
Package	2 batteries; extended package

GPN100 · 100 J

SATOHI GPN100

Details and package

SATOHI LD40B

CORDLESS NAILER WITH A CLOSED-LOOP PNEUMATIC SYSTEM

The LD40B is a cordless nailer designed for high-volume fastening. Its closed-loop pneumatic system delivers consistent driving without a compressor, hoses, or gas cartridges.

The magazine holds up to 33 nails, with a firing rate of up to 2 shots per second. A work light, battery charge indicator, and quick-release nose assembly improve accuracy and simplify maintenance.

TECHNICAL SPECIFICATIONS

System - closed-loop pneumatic
Drive - brushless motor
Power supply - 21 V, 4.0 Ah Li-ion battery
Fastener length - 15-40 mm
Shank diameter - 2.6-3.0 mm
Magazine capacity - up to 33 nails
Fastening rate - up to 2 fastenings/sec
Weight - 3.9 kg

KEY BENEFITS

No compressor, hoses, or gas cartridges required
Fully self-contained and mobile
Consistent fastener driving
High-speed repetitive fastening
Work light and battery charge indicator
Quick-release nose assembly for easy maintenance
Suitable for fastening into concrete and other hard substrates

LD40B

Pneumatic Power. No Compressor Required.

SATOHI CN55

COMPACT COIL NAILER FOR FAST, EFFICIENT WORK

The CN55 is a professional pneumatic coil nailer designed for intensive repetitive woodworking. Its high-capacity 300-350 nail magazine maintains a fast and efficient workflow.

Ideal for manufacturing pallets, cable reels, crates, battens, fencing, decking, and siding.

TECHNICAL SPECIFICATIONS

Nail length - 25-57 mm
Magazine capacity - 300-350 nails
Operating pressure - 5-7 bar
Nail types - smooth, ring-shank, and screw-shank
Dimensions - 283 × 131 × 270 mm
Weight - 2.5 kg

KEY BENEFITS

Compact body with excellent balance
High-capacity coil magazine
Fewer interruptions for reloading
High-speed repetitive operation
Smooth and consistent fastener feed
Simple and reliable pneumatic design
Ideal for pallets, crates, battens, decking, and fencing

CN55

When There's Plenty to Fasten and No Time to Waste

SATOHI CN70

PROFESSIONAL COIL NAILER FOR DEMANDING JOBS

The CN70 is a powerful pneumatic nailer designed for longer, larger fasteners. Its high-capacity coil magazine and consistent nail feed maintain a fast working pace on high-volume timber construction jobs.

Designed for extended repetitive use, the CN70 is reliable and easy to service.

TECHNICAL SPECIFICATIONS

Nail length - 45-70 mm
Shank diameter - 2.3-2.9 mm
Magazine capacity - 225-300 nails
Operating pressure - 5-7 bar
Nail types - smooth, ring-shank, and screw-shank
Weight - 3.5 kg

KEY BENEFITS

Handles longer and larger fasteners
High productivity in repetitive fastening
High-capacity coil magazine
Fewer interruptions for reloading
Consistent nail feeding and driving
Reliable and serviceable construction
Suitable for wooden packaging, pallets, frames, and large timber products

CN70

More Fasteners. More Possibilities.

SATOHI NLP40

CORDLESS 2-IN-1 NAILER & STAPLER

NLP40 is a versatile fastening solution designed for fast, precise fastening of wood and sheet materials.

One tool drives both nails and staples, making it ideal for finishing and carpentry, furniture assembly, paneling installation, and other woodworking applications.

TECHNICAL SPECIFICATIONS

- Impact energy - 30 J
- Motor - brushless
- Nails - 18 GA, F15-F50
- Staples - K410-K438
- Magazine capacity - up to 100 fasteners
- Operating modes - single-shot and rapid-fire
- Fastening speed - up to 100 fasteners/min
- Power supply - 21 V battery
- Includes - 2 batteries
- Tool-free drive-depth adjustment

KEY BENEFITS

- Two fastener types in one tool
- Operates without a compressor or hoses
- Quick switching between single-shot and rapid-fire modes
- High-capacity magazine
- Depth adjustment for different materials
- Long-life brushless motor
- High-speed repetitive fastening
- Ideal for furniture, paneling, trim, and other woodworking applications

NLP40

Two Fastener Types. One Tool.
